

NIRAJ PAWAR

Vadodara | nirajdilippawar77@gmail.com | +91 – 8830083886 | [LinkedIn](#)

Detail-oriented BCA graduate with 3+ months of experience as a Data Analyst and certifications in Data Science & AI. Proficient in SQL, Excel, Power BI, and Python, with hands-on experience analysing 100K+ row datasets. Built interactive dashboards, tracked KPIs, and generated actionable insights that improved processes by 20%. Skilled in data cleaning, visualization, reporting, and ensuring data accuracy to support data-driven decision-making. Strong analytical thinker with a passion for identifying trends, optimizing workflows, and communicating insights clearly to stakeholders.

SKILLS

Key Skills: Data Cleaning & Transformation, Exploratory Data Analysis (EDA), Web Scraping, Dashboard Development, Data-Driven Problem Solving, E-commerce & Superstore Data Analysis, Storytelling, Statistical Analysis, Data Modelling, ETL Processes, Machine Learning, Trend Analysis

Technical Skills: SQL (Joins, Aggregations, Filtering, Query Optimization, Views, Database Design), Python (Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn), Microsoft Excel (Formulas, Pivot Tables, Charts, Data Validation, Lookup Functions), Power BI (Reports & Dashboards, DAX, Power Query), Web Scraping (Beautiful Soup, Requests), Git & GitHub (Basic Version Control), Data Visualization (Graphs, Charts, Trends), Machine Learning (Data Preprocessing, SVM, KNN, Feature Engineering, Regression, Classification, Clustering, Feature Selection), Advance SQL (Indexing, Window Functions, CTEs).

Management Skills: Time Management, Deadline Adherence, Task Prioritization, Team Coordination, Internship Experience Handling Real-World Scenarios, Project Management, Stakeholder Communication, Requirement Gathering, Documentation Management.

Interpersonal Skills: Teamwork, Leadership, Communication, Collaboration, Adaptability, Presentation Skills, Active Listening.

Transferable Skills: Analytical Thinking, Visualization, Organizational Skills, Reporting & Documentation, Problem Solving, Critical Thinking, Research Skills, Decision Making, Pattern Recognition, Business Acumen, Insight Generation.

EXPERIENCE

Unmessenger

Data Science Intern (Virtual)

Noida

Nov 2024 – Jan 2025

- Developed SQL queries for data extraction, filtering, and reporting.
- Built Power BI dashboards and visualizations using training datasets.
- Automated web scraping workflows with Scrapy to gather competitive and product data, increasing data.
- Done SQL Case Study on Social Media Interaction Dataset

EDUCATION

Master of Computer Applications (MCA) - Artificial Intelligence

Parul University

Vadodara

Aug 2025 – Present

Bachelor of Computer Applications (BCA)

Sandip University

Nashik

Sep 2023 – Jun 2025

Executive Program in Data Science & AI (Course)

Skill-Arbitrage

Online

Oct 23 – Present

PROJECTS

Bank Customer Churn Prediction using Logistic Regression

Built a machine learning classification model to predict a customer will leave the bank(churn) based on attributes such as credit score, geography, gender, age, tenure, balance and account activity. Applied Logistic Regression for modelling and evaluated the performance using multiple classification metrics

- -Used logistic regression for binary classification
- -Evaluated model using confusion matrix, Accuracy, Precision, Recall, F1-Score
- -Achieved over 80% accuracy on the test set

E-Commerce Sales Analysis with Power BI

Used Power BI to clean, transform, and visualize sales data, highlighting profit trends, payment preferences, category performance, and top-selling products.

- Analysed 5,000+ sales records across multiple product categories
- Built KPI dashboards tracking revenue, profit, quantity sold, and category performance
- Identified the top 5 products by revenue and evaluated payment mode preferences.
- Delivered actionable insights on category-wise performance and monthly profits
- Created interactive filters and drill-down reports for detailed analysis.

Social Media Interactions Analysis | SQL

Analysed social media engagement data containing users, posts, comments, and hashtags using SQL to uncover interaction patterns and engagement trends.

- Wrote complex SQL queries using JOINS, GROUP BY, Subqueries, and Aggregate Functions.
- Analyzed user activity, post engagement, hashtag popularity, and comment trends.
- Extracted actionable insights to identify high-engagement content categories.
- Optimized queries for efficient reporting and data retrieval.

CERTIFICATION

- Data Science & AI | Skill Arbitrage & Skill India | CERT_2336792 | Feb 2025
- Mastering Data Science & Artificial Intelligence | Dataisgood | DSCS31170 | Dec 2024
- Mastering Data Analysis | Dataisgood | DSCS21308 | Aug 2024
- Python (Basic) Certification | Hacker Rank | 3C0A265FA1C7 | Jun 2024
- Data Science Essentials | Dataisgood | DSCS1422 | May 2024
